

**semanta****International****ENGINEERING GLOBAL SKILLS FOR THE FUTURE**

SEMANTA INTERNATIONAL

Semta International is part of the Semta Group, an employer-led UK education and skills organisation which specialises in meeting the unique needs of the advanced manufacturing and engineering sector and associated industries. We bring together employers, education and government to provide expert guidance, skills solutions and employment focused initiatives to create the highly skilled, dynamic workforce required to drive future global success.

We have a proud history of delivering training in the engineering sector, designing apprenticeships and certificating vocational and technical qualifications for over 60 years. We are recognised by the government regulators for England, Scotland, Wales and Northern Ireland.

With our unrivalled sector experience and qualifications and training expertise we can provide skills development, training and certification that meets your needs.

WHAT WE OFFER

We offer a comprehensive managed skills service including:

RESEARCH AND INSIGHT

Semta is a leading provider of skills and Labour Market Intelligence (LMI) for the advanced manufacturing and engineering sector in the UK. We can bring our years of experience and expertise to help you undertake strategic analysis to identify your organisation's skills needs and make insightful recommendations on how to best meet your training objectives.

CURRICULUM AND QUALIFICATION DEVELOPMENT

Semta has unrivalled experience of working at the heart of the vocational education system with employers and governments in designing, delivering and quality assuring qualifications and apprenticeships. This experience will allow us to help you develop accredited and non-accredited qualifications and training programmes.

NATIONAL OCCUPATIONAL STANDARDS DEVELOPMENT

Semta is the government approved occupational standard setting organisation for the advanced manufacturing and engineering sector in the UK. We have worked collaboratively with employers to develop more than 2,500 industry standards, which have international credibility and recognition. Our unique knowledge and expertise in this area is invaluable in workforce development, providing a robust consistent benchmark of the skills needed by a globally competitive labour force.

TRAINING AND DELIVERY

Depending on your requirements, we can deliver and develop quality, flexible and cost effective training directly to learners or provide bespoke train the trainer programmes, including assessor and verifier training.

ACCREDITATION AND CERTIFICATION

Your customised training courses can be accredited and certificated by Semta International (through our awarding organisation EAL). This provides you with a flexible solution to qualification and training delivery which can meet local, national or international needs. Whether you are an employer or an education and skills provider, we can certify the delivery of a wide range of approved UK regulated qualifications or customised training courses. This will offer you the assurance that quality and internationally recognised skills standards and competencies have been attained.

Sectors we work with include:

aerospace and defense | automotive | composites | construction/building services | electronics | marine | metals | mechanical | rail | space

QUALITY ASSURANCE

We can offer an independent assessment and quality assurance service, working with you to support the highest standards in training and qualifications delivery.

BESPOKE SOLUTIONS DEVELOPMENT

Every organisation is different and we are committed to providing solutions to your skills needs through tailor-made, flexible solutions – no matter what the scale.

We offer a comprehensive consultancy service, providing advice, guidance and technical expertise at every step to meet your specific needs, working with you to maximise your organisation's potential.

why choose SEMTA International?

Unrivalled advanced manufacturing and engineering sector expertise

The Semta Group has been working with employers to design apprenticeship frameworks, qualifications and training solutions for more than 60 years.

Our skills specialists have an unrivalled breadth and depth of industry knowledge to support and advise you every step of the way.

Responsive and innovative

Working in such fast moving sectors against a backdrop of technological innovation and constant demands for efficiency and quality improvements, we recognise your need for a responsive and innovative skills solutions provider. We can help you keep pace with change to future proof your talent pipeline, which is essential for continued global success.

Quality

We recognise the far reaching benefits that UK quality assured apprenticeships, training and accreditation can bring to both employers and professionals. The Semta Group has a global reputation for the quality of our services:

- Approved and trusted partner in Oman and India
- Certification services provider in seven countries and expanding rapidly
- Qualification of the Year at the Federation of Awarding Bodies (FAB) Awards 2015
- Recognised as a Grade 1 apprenticeship certification body by the Federation for Industry Sector Skills & Standards (FISSS) (Grade 1 across all measures: capacity, compliance and customer service)
- Approved National Occupational Standards (NOS) developer and reviewer for engineering and advanced manufacturing by UK government agencies

Comprehensive skills solution service

We deliver a full global skills solution service from analysis, to development, delivery, evaluation, certification and consultancy - offering a unique one-stop shop service.
